LAB No. 5

Lab Goals/Objectives:

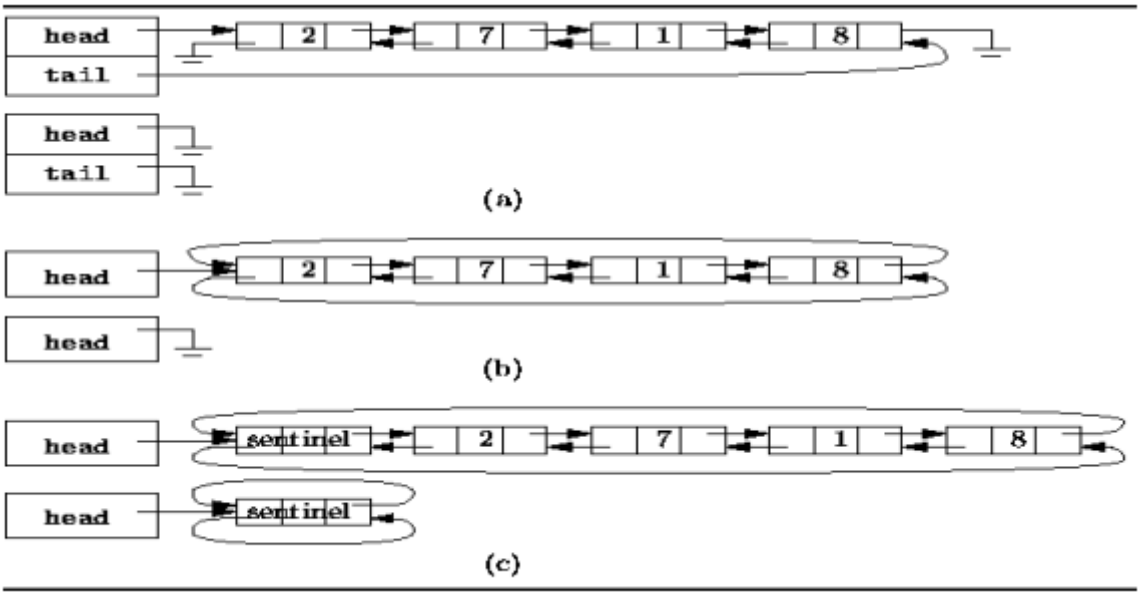

- Circular LinkList
- Doubly LinkList

Equipment Required: Computer and Dev C++ Compiler

Theory/Relevant Material: Link List variants, Pointers & Dynamic Memory Allocation

Lab Tasks:

In a doubly-linked list, each list element contains two references--one to its successor and one to its predecessor. There are many different variations of doubly-linked lists

Implement the circular Doubly linklist with following functions:

a) void insert(int b)

b) void delete(int y)

c) void deleteAt(int nodeno)

d) void insertAt(int r)

e) void search(int u)
