LAB No. 12

Lab Goals/Objectives:

- Implementation of graph as a data structure.
- Devising solution of path finding problem.

Equipment Required: Computer and Dev C++ Compiler

Theory/Relevant Material: Graph, BFS, DFS, Single source shortest paths

Lab Tasks:

- Complete the definition of the missing function in the graph. Check its correctness by reading graph from file provided and display it.
- Write the code that read the source and target destination in the file and find the path between source and destination.
- Bonus: extra marks if your path is the optimal path.

Graph used in lab manual represents this form of the layout:
